INVITATION TO PHD WORKSHOP
in Polar Science Centre

WHAT IS POLAR SCIENCE CENTRE?
The Polar Science Centre is an interdisciplinary centre at the Faculty of Science, University of Copenhagen, established in 2009, and covers a wide range of research disciplines. You can read more about the centre at www.science.ku.dk/psc

WHY ARE WE ARRANGING A PHD WORKSHOP?
The aim of the workshop is to provide a platform for interdisciplinary collaboration at the PhD level between the different fields of polar research at the Faculty of Science, and to discuss polar research themes of current interest. We therefore invite you to present your PhD project to the members of Polar Science Centre and their PhD students.

WHO ARE INVITED?
PhD students at the Faculty of Science whose research has an Arctic or Antarctic focus are invited. Other interested members of the faculty staff, post docs, PhD students in other fields of research, and MSc students are also welcome until we run out of seats.

PROGRAM
The program includes lectures by two invited speakers, multiple presentations by PhD students as well as an overview of activities and facilities in Polar Science Centre.

HOW?
In order to allow for as many presentations as possible, each presenter will be allotted 15 min, which will be followed by questions from appointed referees chosen among the members of Polar Science Centre.

The audience will include the members of Polar Science Centre, i.e. scientists from five Departments under the Faculty (IGG, BIO, SNM, NBI, LIFE).

It will also be possible to submit posters to the workshop. The poster sessions will be based on ultrashort presentations followed by questions from appointed referees.

WHEN & WHERE?
September 28th, 9-18, at Red Stue (The Red Room), 1st floor, IGG Department of Geography & Geology, Øster Voldgade 10, 1350 Copenhagen K.

HOW DO I SIGN UP?
Use the online form at www.science.ku.dk/psc/education/phd-workshop/

There is no conference fee, and food and drinks are free of charge. Please register before August 31st.
